**PROCEDURE FOR THE APPLICATION
OF THE SUPER CATALYZER
ON ROTATIV OVENS**

PROCEDURE FOR THE APPLICATION OF THE SUPER CATALYZER ON ROTATIV OVENS

- Read the temperatures and make an analysis of the smoke.
- Read the oil pressure.
- Read the pressure of the atomizing air fan.

Assembly

- Install the Super Catalyzer on the head of the burner to lance.
- Read the temperatures and make an analysis of the smoke.
- Reduction of the pressure of the oil fuel from 25 to 21 bar.
- Control of the quantity of fuel that has been used.

- Read of the temperatures and make an analysis of the smoke.
- Reduction of the atomizing air of 1-1½ bar.
